★ OFFICIAL ADMINISTRATOR MANUAL

Aaradhya Gruh Udyog MLM System Admin Guide

Complete step-by-step user manual for managing the 1:3 placement matrix, moving members, assigning roles, verifying KYC, and executing commission payouts.

1:3 Matrix	753 Active	20 Levels
STRICT TERNARY HIERARCHY	DISTRIBUTOR ACCOUNTS	DIRECT SELLING PV FORMULA

Client: Aaradhya Gruh Udyog & Kharchdaan.com
System: Laravel MLM Enterprise Core v2.0

Top ID Root: C22020008 (Nimesh Jagirdar)
Prepared: October 2026

1. System Architecture & Fundamental Rules

This manual enables your administrative team to manage all MLM operations directly from the web backend dashboard without technical programming knowledge.

Key Concept: Placement Tree vs. Sponsor Network
In this enterprise direct-selling system, there are two distinct networks:

- **Placement Tree (1:3 Matrix):** Determines physical hierarchy on the visual chart. Every single member card can have **strictly at most 3 direct children** (LEFT , MIDDLE , RIGHT).
- **Sponsor Network (Direct Referrals):** Tracks who brought in whom. A distributor can personally refer **unlimited** people. If their 3 placement slots are full, new referrals spill over downline into open slots.

Network Top Leader Structure

The network is anchored under **Top ID C22020008 (Nimesh Jagirdar)**, with 3 primary Leader Pillars directly underneath:

POSITION	CUSTOMER ID	DISTRIBUTOR LEADER	ROLE SNAPSHOT	TEAM SIZE
TOP ID (ROOT)	`C22020008`	**Nimesh Jagirdar**	Company Founder & Master Root Leader	752 Downlines (100%)
LEFT SLOT	`C22010003`	**Janakben Bihola**	Left Pillar Leader	291 Downlines
MIDDLE SLOT	`C22020001`	**Niruben Zala**	Middle Pillar Leader	252 Downlines
RIGHT SLOT	`C22030018`	**Gaurav Agarwal**	Right Pillar Leader	206 Downlines

Zero Dummy Codes Guarantee:
All company placeholder codes (`M1` through `M13`) have been permanently deactivated. Every card displayed in your tree represents a real human customer/distributor with their actual name, customer code, phone number, and verified KYC status.

Admin Navigation Quick Links

MODULE	URL PATH	MAIN FUNCTION
Placement Tree (1:3)	`/admin/mlm/tree`	Visual org chart, level expanders, downline counts, node focus
Move Member Tool	`/admin/mlm/tree/move/{id}`	Reposition any distributor or entire team to new parent/slot
Distributor Members	`/admin/mlm/members`	List all distributors, KYC review, profile edit, status toggle
Sponsor Network	`/admin/mlm/sponsor-network`	View referral hierarchy (who referred whom for commissions)
Genealogy Grid	`/admin/mlm/genealogy`	Table view of all downlines with export to CSV/Excel
Commission Rules	`/admin/mlm/calculations`	Edit PV rates, high/low level brackets, commission previews
Payout Cycles	`/admin/mlm/payouts`	Generate weekly/monthly payouts, upload bank proof, mark paid

2. Step-by-Step: Using the Visual Placement Tree

The interactive tree canvas allows you to explore, inspect, and drill down into any distributor's 1:3 ternary network across all 20 levels.

1 **Access the Placement Tree**

From your left admin sidebar, click **MLM Management > Placement Tree** or open `/admin/mlm/tree`. The page automatically mounts with Top ID **Nimesh Jagirdar** and opens Level 1 and Level 2 automatically.

2 **Use View Mode Toggles (Cards / Compact / Circles)**

In the upper-left toolbar, switch between display modes:

- **Cards:** Shows full details (Name, Customer ID, Phone, Level, Sponsor, Total Income).
- **Compact:** Narrower cards allowing 3× more nodes on screen at once.
- **Circles:** Circular nodes for high-density bird's-eye views.

3 **Instantly Jump to Any Member Using Search**

Type any Customer ID (e.g., `C22030018`), Name (e.g., `Gaurav`), or Mobile Number into the **Search & Jump** input box. Click **Find**, then click on the search result to automatically scroll and zoom directly to that member card.

4 **Quick Leader Network Toolbar**

Above the tree canvas, click any orange leader pill (e.g. **Janakben Bihola**, **Niruben Zala**, **Gaurav Agarwal**, or **Devang Raval**) to instantly jump directly to their organization branch.

5 **Expand / Collapse Branches Dynamically**

Click the circular `+` / `-` button at the bottom of any card to load or hide their 3 placement children. You can also click toolbar buttons:

- **L1:** Shows Level 1 leaders.
- **L2:** Shows Levels 1 and 2.
- **L3:** Shows all teams down to Level 3.
- **Expand All:** Expands the entire visible canvas.
- **Collapse:** Collapses back to the root card.

6 **Inspect Complete Member Profile Drawer**

Click the blue **Info** button on any card. A side drawer slides out from the right displaying:

- Total Commission Income calculated from all store orders.
- Direct Sponsor name and phone number.
- Placement Parent name and slot.
- KYC Status (Approved/Pending) and full shipping address.

7

Subtree Focus Drill-Down

Click the orange **Focus** button on any card to isolate that distributor as the temporary root. A breadcrumb bar appears at the top (e.g., `Top Root > Gaurav Agarwal > Devang Raval`). Click **Back to Top Root** anytime to return to Nimesh Jagirdar.

🔍 **Zoom & Canvas Navigation Tips:**

- Click and drag anywhere on the dotted canvas to pan smoothly in any direction.
- Hold `Ctrl` and scroll your mouse wheel to zoom in or zoom out.
- Click **Fit View** in the toolbar to automatically scale and center the entire tree onto your screen.

3. Step-by-Step: Moving a Member to a New Position

When the client or management wants to reorganize branches, change who sits under whom, or move a distributor to another leg, use the built-in **Move Member** tool.

What happens when you move a member?
When a member is moved to a new parent and slot:

- **Entire Downline Travels Together:** All children, grandchildren, and teams under the moved member remain intact and move with them automatically.
- **Sponsor Tree Unaffected:** Direct referral commissions and sponsor relationships do NOT change unless you explicitly choose to change the sponsor.
- **Automatic Loop Prevention:** The system strictly blocks circular movements (e.g. you cannot place a parent under their own downline child).

Detailed Step-by-Step Move Procedure:

1 Open the Move Tool

Two easy ways to open the move form:

- **From Tree View:** Open the Info drawer for the member you wish to move, and click the **Move Member** action button.
- **From Member List:** Go to `/admin/mlm/members`, find the member, click the **Actions** dropdown, and select **Move Position**.
- **Direct URL:** Navigate to `/admin/mlm/tree/move/{MEMBER_ID}`.

2 Review Current Position Snapshot

The top card displays the member's current state: Customer ID, Name, Current Placement Parent, Current Position (Left, Middle, Right), and total downlines being moved.

3 Select the New Placement Parent

In the **New Placement Parent** search box:

- Type the Customer ID or Name of the distributor under whom you want to place this member.
- Select the distributor from the dropdown search results.

4 Select an Available Placement Slot

The form will check the new parent's current children and show the 3 slots:

- LEFT SLOT
- MIDDLE SLOT
- RIGHT SLOT

Choose an available (open) slot. If a slot is already taken, the system will prevent duplicate assignment.

5

Click "Preview Movement"

Always click **Preview Movement** before saving. The system performs automatic sanity checks:

- Verifies that the new slot is not occupied.
- Verifies there is no circular loop.
- Calculates new matrix levels and downline totals.

6

Confirm and Apply Movement

Click **Confirm & Apply Move**. The database updates atomically inside a transaction, the visual placement tree re-indexes, and you will be redirected back to the tree view with the member successfully in their new position.

4. Step-by-Step: Member Management & KYC Verification

How to register new distributors, update personal information, review legal compliance documents, and manage status.

Adding a New Distributor Manually

1 Navigate to Add Member

Click **MLM Management > Members**, then click the blue **+ Add New Member** button (or visit `/admin/mlm/members/create`).

2 Fill Personal & Contact Details

Enter Full Name, Mobile Number, Email Address, Password, and Full Residential Address (City, Pincode, State).

3 Assign Sponsor & Placement Position

- **Direct Sponsor ID:** Enter the Customer Code of the distributor who introduced them (e.g. `C22020008`).
- **Placement Parent ID:** Enter the Customer Code of the node directly above them in the 1:3 tree.
- **Placement Position:** Select `Left`, `Middle`, or `Right`.

4 Save & Generate Customer Code

Click **Save Member**. The system automatically creates their user account, assigns the Customer/Distributor role, generates their unique customer code, and adds them to the tree.

Reviewing and Approving KYC Documents

Before commissions can be paid out, distributors must submit verified KYC data:

REQUIREMENT	WHAT TO CHECK	ACTION
PAN Card	10-digit alphanumeric PAN format (e.g. ABCDE1234F). Matches member legal name.	Encrypted in database; verified for TDS compliance.
Aadhaar Number	12-digit UID reference or front/back identity photo.	Stored securely with hash verification.
Bank Account	Account Number, Account Holder Name, IFSC Code, Bank Name and Branch.	Must match name on PAN card for payout NEFT/IMPS.
Cancelled Cheque	Image proof of cheque or bank passbook showing printed name and IFSC.	Click **View Cheque Image** in admin to verify.

✅ **How to Approve or Reject KYC:**

1. Go to `/admin/mlm/members/{id}/kyc`.
2. Review the submitted documents and bank details.
3. Click **Approve KYC** to enable payouts, or click **Reject KYC** and enter a reason (e.g. "IFSC code mismatch") so the distributor can re-upload.

5. Step-by-Step: MLM Calculation Rules & Payout Cycles

How commission formulas calculate income from customer purchases and how payouts are processed.

Direct Selling Commission Calculation Formula

Active Calculation Rule: Direct Selling PV Formula v1

When an order is completed, commission income is distributed across 20 upline levels based on the product purchase amount:

```
Commission = (Order Total / PV Divisor) × Level PV Rate × Income Rate
- PV Divisor: 3,000
- High Level Rate (Levels 0 to 7): 13.5 PV
- Low Level Rate (Levels 8 to 19): 0.75 PV
- Income Rate: 0.20 (20%)
```

Modifying Calculation Rules (If Policy Changes)

1. **Open Calculation Rules Module**
   Go to **MLM Management > Calculation Rules** (`/admin/mlm/calculations`).

2. **Use the Commission Preview Simulator**
   Before making changes, enter a test order amount (e.g. `₹1,000` or `₹3,000`) in the Simulator box. The table shows the exact rupee commission paid to each level from Level 0 to Level 19.

3. **Create or Update Rule Version**
   To change percentages, click **Create New Calculation Rule**. Enter the new rates, set the effective date, and mark it active. Old rules are preserved for historical audit trails.

Running Payout Cycles & Processing Bank Transfers

1. **Open Payout Cycles**
   Navigate to **MLM Management > Payouts** (`/admin/mlm/payouts`).

2. **Generate New Payout Cycle**
   Click **+ Generate Payout Cycle**. Select the period (e.g. Weekly: 1st to 7th, or Monthly: 1st to 30th). The system scans all eligible orders, computes net earnings minus TDS and admin fees, and generates the line items for all KYC-approved distributors.

3. **Review, Approve & Export Bank NEFT Sheet**
   Review total payable amount. Click **Export Excel / CSV** to get the bank transfer sheet with Account Numbers, Beneficiary Names, and IFSC codes for bulk NEFT upload in your corporate bank portal.

4

Upload Proof & Mark Paid

After bank execution, upload the bank transaction UTR receipt / payment proof and click **Mark as Paid**. SMS/Email notifications are sent to distributors and wallet balances update automatically.

6. Frequently Asked Questions & Support

Q1: Can a distributor have 4 or more children directly under their card?

Answer: No. In accordance with the company's 1:3 placement matrix policy and database integrity constraints, every card has strictly up to 3 slots: `Left`, `Middle`, and `Right`. Any additional referrals sponsored by that leader must be placed downline under their team members as spillover.

Q2: What happens if a distributor wants to move their position?

Answer: An admin can use the **Move Member** tool (`/admin/mlm/tree/move/{id}`). Select an open slot under the desired parent and click **Confirm & Apply Move**. All downline members under that person will move with them automatically without breaking any team connections.

Q3: How do I change an admin or distributor password?

Answer: Go to **MLM Management > Members**, find the distributor, click **Edit**, enter the new password in the password field, and click **Update Member**.

Q4: Why was a member's payout placed on hold?

Answer: Payouts are automatically held if the distributor's KYC status is `Pending` or `Rejected`, or if their bank IFSC code is invalid. Once you approve their KYC in `/admin/mlm/members/{id}/kyc`, their held balance automatically rolls over into the next payout cycle.

Q5: How can we re-import the master Excel sheet if a new batch arrives?

Answer: Place the new Excel file in `backend/excel sheetr/Aaradhya Gruh Udyog - Master Data.xlsx`, and run the automated command: `php artisan mlm:import-excel`. It parses customers, validates 1:3 placement slots, updates transactions, and syncs the database.
